2024-2025**

February 24 to April 11 2025

EmergiNet

Mr. Timothy Joseph Quinain
Trainor

Submitted By:
Ben Junnel B. Oro
BCPE - 4

Submitted to:
Engr. Stephanie Grace Cortes
Instructor

Cebu Institute of Technology – University
College of Engineering and Architecture
Bachelor of Science in Computer Engineering

Company Profile

Name: Emerginet

VMGO:

1. **Vision:** To be a leading provider of emergency response and public safety communication solutions in the Philippines.
2. **Mission:** To develop innovative and reliable systems that empower communities, local governments, and emergency services to respond effectively to crises.
3. **Goals:**
 - a. Enhance emergency communication infrastructure.
 - b. Provide real-time monitoring and alert systems.
 - c. Support disaster preparedness and response.
4. **Objectives:**
 - a. Deliver high-quality emergency response solutions.
 - b. Expand partnerships with LGUs and emergency agencies.
 - c. Continuously improve system features based on client feedback.

Nature of Business:

Information and Communications Technology (ICT) solutions provider specializing in emergency response systems, public safety, and monitoring technologies.

Contact Details:

0939 330 0971

Name of Mentors/Trainers:

Mr. Timothy Joseph Quinain

Cebu Institute of Technology – University
College of Engineering and Architecture
Bachelor of Science in Computer Engineering

Trainee's Individual Profile

Name of Student:	Ben Junnel Oro
Course and Year:	BSCPE-4
OJT Course:	CPE460-H1
Department Assigned:	Tech Support and System Maintenance and Operations
Name of Mentor:	Mr. Timothy Joseph Quinain

Personal Data

Gender:	Male
Date of Birth:	March 11, 2002
Marital Status:	Single
Height:	165 cm
Weight:	67 kg
Nationality:	Filipino
Religion:	Roman Catholic
Address:	Bulacao, Talisay City, Cebu 6045
Contact Number:	0945-588-6644
Email:	benjunneloro@gmail.com

Personal Skills

1. Effective communication
 2. Critical thinking
 3. Adaptability
 4. Team collaboration
 5. IT troubleshooting
-

Cebu Institute of Technology – University
College of Engineering and Architecture
Bachelor of Science in Computer Engineering

Specialization

1. Programming (C, C++, C#, Arduino)
 2. Web Development (React.js, Firebase)
 3. System Maintenance
 4. Electronics and Embedded Systems
-

Tasks Performed as OJT

1. Assisted in troubleshooting and maintaining network systems
 2. Supported the setup of Smart Monitoring System.
 3. Helped in data encoding and documentation.
 4. Participated in system checks and operational monitoring tasks
 5. Observed and assisted in handling client technical concerns
-

Learning Insights

Technical:

1. Gained hands-on experience in system diagnostics and troubleshooting
2. Applied programming knowledge in real-world systems
3. Learned proper procedures for maintaining and operating systems

Non-Technical:

1. Improved time management and professional communication
 2. Learned the importance of teamwork and coordination
 3. Developed workplace discipline and adaptability
-

**Cebu Institute of Technology – University
College of Engineering and Architecture
Bachelor of Science in Computer Engineering**

Seminars, Workshops, Trainings, and Other Activities Attended

1. Orientation on Emergency Response System (EMERGINET)
 2. Training on Basic System Troubleshooting
 3. Workshop on Client Support Management
 4. Weekly mentoring sessions with the technical supervisor
-

Problems Encountered, Comments, and Recommendations

Problems Encountered:

1. Difficulty adjusting to unfamiliar systems initially
2. Minor technical limitations with unfamiliar hardware

Comments and Recommendations:

1. More structured onboarding for future trainees
 2. Recommend adding documentation manuals for system operations
 3. The OJT experience was very educational and practical
-

Estimated Number of Hours:

- 246 hours.
-

Cebu Institute of Technology – University
College of Engineering and Architecture
Bachelor of Science in Computer Engineering

Summary of Weekly Reports

Week 1:

1. Assisted in office setup and app orientation.
2. Collected DRRMO hotlines for database inclusion.
3. Welcomed the senior IT consultant.
4. Used Semaphore for secure code distribution.
5. Created a user guideline to support app rollout.

Week 2:

1. Helped facilitate the rollout of the Emerginet app.
2. Collected police hotlines for the database.
3. Assisted in responding to user calls from Tagbilaran via the Emerginet app.
4. Developed a demo for app registration and installation.

Week 3:

1. Gathered additional PNP and hospital hotlines.
2. Sourced contact details for city mayors.
3. Drafted official letters addressed to local mayors.
4. Participated in team discussions with company leadership for project alignment.

Week 4:

1. Contributed to the app rollout in Tagbilaran, Bohol.
2. Used Semaphore to distribute registration codes.
3. Welcomed company executives visiting the office.
4. Discussed app challenges with the executive assistant.

College of Engineering and Architecture
Bachelor of Science in Computer Engineering

Week 5:

1. Continued collecting PNP and hospital hotline data.
2. Assisted in distributing registration codes.
3. Helped test a new version of the Emerginet app.
4. Supported poster design preparations for the MOA signing event in Tagbilaran.

Week 6:

1. Monitored responses from the Google Sheets registration tracker.
2. Contacted 42 individuals in Cebu to assist with app installation.
3. Aided the executive assistant of the president in drafting the app's Software Requirements Specification (SRS).
4. Continued collecting emergency contact information from hospitals and police stations.

Week 7:

1. Send formal emails to city mayors.
 2. Further collected hospital hotlines for emergency contact database updates
-

Bachelor of Science in Computer Engineering

Reflection:

My on-the-job training at Emerginet has been a valuable and eye-opening experience. One of the most significant realizations I had was understanding how vital it is to respond to emergencies in the shortest time possible. The Emerginet app plays a critical role in achieving this goal by serving as a 60-second emergency response tool. It connects users to emergency services such as fire, police, ambulance, and internal safety teams quickly and efficiently—often within just one minute of alerting. This rapid coordination can mean the difference between life and death in many emergency situations.

The app's real-time monitoring, automated SMS alerts, and integration with local authorities provide a sense of security and readiness. I've come to appreciate the importance of having updated and readily accessible emergency contacts at all times, not just for individual safety but also for organizational preparedness. Emergencies are unpredictable, and the best defense is preparation. Tools like Emerginet not only promote safety but also empower communities and workplaces to be more proactive and responsive.

This experience has helped me grow both technically and personally. I learned how digital solutions can address real-world problems and how crucial it is to be part of innovations that save lives.
